

Do I Have a Claim?

Bohm & Jones, P.C.

Do I Have a Claim?

Our law firm's primary areas of practice involve personal injury claims arising out of premises cases (slips and falls/trips and falls) occurring at a business, a store, at someone else's apartment, on a construction site (when caused by someone other than a co-worker), automobile collisions, and homeowner claims, such as dog bites and swimming pool accidents.

In each of these cases, a common question we get is "Do I have a claim?". We can generally answer that question with one phone call. The attorneys and staff of **Bohm & Jones, P.C.** are thoroughly familiar with the aspects of the law related to injury claims. Our attorneys are available to discuss your potential claim and answer your questions. There is never a charge for a telephone call or an initial consultation to discuss your unique situation. All the factors of the incident which led to your injury will be explored. Experts are available to assist us should your claim involve unique or unusual facts or circumstances.

The partners in the firm each have more than twenty years of experience. There are few incidents in which one of the attorneys does not have some familiarity. We are willing to take the time to carefully review the facts of how you were injured. Too often injured people rely upon the opinions and thoughts of non-lawyers, such as friends, neighbors, or co-workers and end up not pursuing a claim when they are entitled to be compensated for their medical expenses, loss of income, inconvenience and pain. Why not speak with attorneys who know the law in Arizona, and can give you the benefit of their knowledge and experience? Utilize the opportunity to ask about your claim, or the claim of your mother or child. Many times claims are not readily apparent. Give **Bohm & Jones, P.C.** the opportunity to help you determine if you have a claim.

Once the determination is made that you have a claim, we will then pursue the claim on your behalf. Evaluation and determination of your damages will be made when you are released from medical treatment. Settlement negotiations will be conducted on your behalf, with your input. If necessary, we will file a lawsuit to pursue your claim should the adverse party not accept or recognize their liability, or be unwilling to compensate you fairly.

If you, or someone you know, are injured as a result of the fault of someone else, such as a business owner, a landlord, another driver, a dog or neighbor, please call us. We are willing to help and assist you to evaluate and pursue such claims. Do you have a claim? To find out, call us at **(602) 635-1384**.
